PERSONAL SUMMARY

Information Systems and Business Analytics candidate with experience in data products, BI reporting, information management and AI/workflow automation. Turns messy data, unclear requirements and fragmented processes into governed datasets, practical dashboards and decision-ready outputs, bringing structured thinking, calm stakeholder communication and ownership across analytics, business analysis and digital operations.

KEY SKILLS

- Programming: Python (Pandas, NumPy, Scikit-learn), R, HTML/CSS/JavaScript
- Visualisation & BI: Python(Matplotlib, Seaborn), Power BI, Tableau, Advanced Excel
- Database: SQL querying, relational data modelling, joins, views, SQLite, data validation checks, MongoDB
- Business Analysis: requirements gathering, documentation, stakeholder translation, practical solution design
- Process Modelling: AS-IS / TO-BE analysis, BPMN/UML, ETL/ELT, workflow improvement
- Data Governance: classification, metadata management, information quality, privacy-by-design
- Enterprise & Delivery Tools: Microsoft 365, SharePoint, OneDrive, AWS/Azure, SAP ERP, Git/GitHub

EDUCATION

The University of Auckland	Jul 2024 - Nov 2026
<i>Bachelor of Commerce – Information Systems / Business Analytics (Grade: A-)</i>	
University of Science and Technology Beijing	Aug 2022 - Jan 2024
<i>Bachelor of Commerce – Information Management and Information Systems (GPA: 3.74 / 4.0, Top 20%)</i>	

WORK EXPERIENCE

Bay of Plenty Regional Council	Nov 2025 - Feb 2026
<i>Summer Assistant – Information & Data Team Intern</i>	
• Delivered 10+ council data products across records, service requests, assets and environmental operations, reducing data-quality issues 35%, cutting retrieval time 40% and supporting regional decisions. • Built Python, SQL and Power Query reporting workflows, using MS Copilot to speed prototyping, improve data-quality checks and document reusable processes, cutting manual work by 60%+. • Migrated legacy datasets/content into SharePoint/M365 and Azure-backed reporting, strengthening taxonomy, permissions, retention metadata, lineage, secure governance and access. • Partnered with policy, operations, records and information teams to gather requirements, validate outputs, launch Power BI dashboards/executive reports adopted by 5+ units, train users and hand over BAU docs.	
The University of Auckland	Feb 2026 - Nov 2026
<i>Teaching Assistant – Information Systems & Ops. Mgmt (ISOM) Department</i>	
• Facilitated tutorials for a senior Information Systems course (<i>Digital Strategy and Transformation</i>), helping students apply AI and digital strategy frameworks to analyse organisations and business challenges. • Coached students to use AI and emerging digital tools responsibly, structure evidence, analyse organisations and turn ambiguous business challenges into clear, practical recommendations. • Supported course delivery through marking, preparation, and constructive academic feedback.	
University of Science and Technology Beijing	May 2023 - Oct 2023
<i>Team Leader – Suoxing Research & Practice Team (DocAdvisor Project)</i>	
• Led a 10-member team to launch DocAdvisor, an AI-enabled healthcare prototype validated through pilots. • Converted user needs into AI product logic and validation flows, and built the website independently. • Drove product strategy, stakeholder communication and public storytelling, securing 20+ national media features incl. People's Daily and 3M+ views while turning AI capability into credible user impact.	

CERTIFICATIONS

- | | |
|--|----------|
| • Google Advanced Data Analytics | Jul 2025 |
| • Microsoft Power BI Data Analyst Professional Certificate | Jan 2026 |

PROJECT EXPERIENCE

Airline Network Structure & Connectivity Analytics | Live Dashboard | GitHub

Jan-Jul 2026

Python · SQL · pandas · SQLite · Observable Framework · JavaScript · GitHub Actions

- Re-engineered an airline analytics project around 52,296 validated historical route presences, replacing unsupported frequency assumptions with a defensible network-structure framework.
- Built a reproducible Python/SQL pipeline across 67,663 raw records, resolving airport ID-code conflicts, applying quality flags and producing deterministic outputs verified by 10 automated tests.
- Benchmarked 566 airlines and 2,979 resolved airports, showing that network breadth, geographic reach and hub dependence rank carriers differently, while codeshare uplift was material for only 146 airlines.
- Designed and deployed a responsive interactive dashboard on GitHub Pages, combining airline exploration, clear analytical storytelling and transparent methodology with automated CI/CD.

GenAI Learning Analytics Research Project - The University of Auckland

Dec 2025

- Investigated generative AI adoption in student learning workflows through structured interviews and qualitative data analysis. Collaborated with ISOM professors and Postgraduate students.
- Analysed behavioural patterns in AI-assisted problem-solving and knowledge acquisition.
- Generated insights to support the design of AI-enabled adaptive learning systems.

VOLUNTEER EXPERIENCE

Digital Systems Class Rep - The University of Auckland

Jan 2025 - Mar 2025

- Liaised between faculty and 200+ students, coordinating course communications and feedback.

Tauranga Marine Environment Volunteer

Jan 2026

- Supported coastal clean-up initiatives with Sea Cleaners to restore local marine ecosystems.

Metro Volunteer – Passenger Services

Feb 2023 - Sep 2023

- Assisted passengers with route planning and travel enquiries across major Beijing subway stations.

HONOURS

The University of Auckland

- International Student Excellence Scholarship (*top 50 international students of the year*) Jul 2024
- Certificate of Distinction (*Statistics for Commerce*) Dec 2025

University of Science and Technology Beijing

- Renmin Scholarship (*Awarded for top 20% academic excellence*) Nov 2023
- Best Product Prototype Award (*for DocAdvisor project*) Aug 2023
- Best Students Team Award (*for Suoxing Team*) Aug 2023
